

Auckland Opioid Treatment Service (AOTS)

Supporting people in their
recovery

When you're ready!
call **845 1818**
www.cads.org.nz

Through medication and support
people can reduce harms
and achieve stability in their lives

Auckland Opioid Treatment Service (AOTS) provides support and medications (methadone or suboxone®) to people dependent on opioids.

Ongoing individualised treatment or short-term reduction plans are available depending on your needs.

Opioid substitution treatment (OST) is well documented as a very effective treatment. The stability the treatment offers gives people the time they need to change their lifestyle and begin their recovery.

Open Mon - Fri 9am - 5pm @

- CADS North (Takapuna)
- CADS West (Henderson)
- CADS South (Manukau)
